

World Class Domains

We introduce new opportunities of Internet to the world. We bring the world's highest standard in the field of the domain registration and management. We own the ICANN accreditation that allows us to directly register generic domains. In doing so, we facilitate the registrars and administrators of a large number of domains to manage their daily work.

We are REGTONS.com

Quick and Direct Way to Domains

We do not want to just resell domains to our partners, but to provide them with the best services that individual registers allow. Unlike other solutions, we do not require lengthy manual registration, but we operate a fully automated system developed by us and that saves the clients time. With our own accreditation, we guarantee a direct path between the customer and register without any other intermediaries.

Individual Approach

Our products are designed especially for subjects with a higher number of domains (graphics studios, web hosting, and global companies), accredited registrars and domainers. We provide customers from the ranks of accredited registrars and resellers with an individual approach, including special price lists and operation of own websites on our interface.

Services without Borders

We can register any domain worldwide upon meeting the conditions of the TLD. We can offer our clients a selection of more than 1000 suffixes. With our seven years experience of market activities in the Czech Republic and high-tech facilities, we currently manage over 380,000 domains.

OUR ACCREDITATIONS

GENERIC TOP-LEVEL DOMAINS

.asia, .biz, .com, .info, .mobi, .name, .net, .org, .pro, .tel, .xxx

WORLD CLASS DOMAINS

WITH REGTONS FROM ANDORRA TO ZIMBABWE

WHY ALL THE WAY FROM ANDORRA?

Have you ever tried to register a .ad domain? This is a task for experts.

We offer over 300 worldwide domains (over 40 exotic countries) and we are ICANN accredited.

SIMPLE MANAGEMENT AND ENDLESS OPTIONS.

Our customers manage their domains through a system that we have developed enabling the creation of Reseller accounts and Registrar panels. The management system provides a full line of automated functions to satisfy even the most demanding users with hundreds of thousands of portfolios.

WHY DO BUSINESS WITH US?

- Take advantage of a wide range of sales offers for partners.
- Access to fast API interfaces (SOAP, EPP).
- Personal approach and register anywhere function.
- Local contact with a long list of countries

WHY ALL THE WAY TO ZIMBABWE?

We believe in better tomorrows and we endeavor to support company expansions to Africa, as well as other countries currently faced with the challenges of development. We do not rule out even the smallest of exotic corners on our planet.

JOIN THE RESELLER PROGRAMME

WHO?

The Reseller Programme is designed for users who wish to provide services in the field of registration and administration of domains directly to their clients. Such users are especially web hosting companies, web design studios, administrators of a large number of domains and network administrators.

WHAT?

Our Reseller Programme allows the clients to:

1. use Web Reseller interface,
2. administer users,
3. use simplified authorization of domain changes,
4. have their own logos on the authorization pages,
5. use Whois Reseller banner (text that can be attached to the end of Whois server output)
6. use the dedicated support for the API,
7. operate with their own HTML/CSS on their own domain.

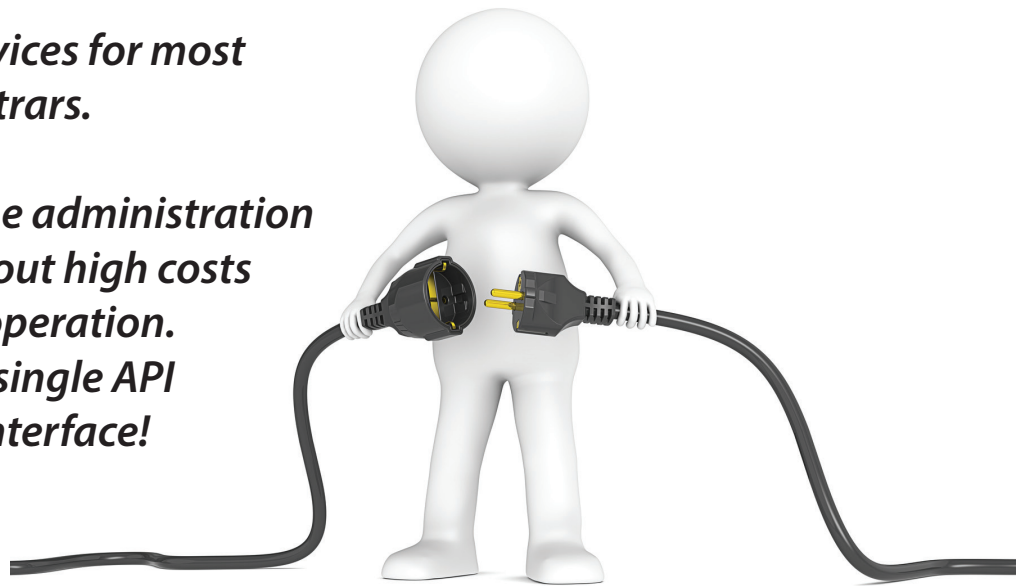

Take One Step and Become a Member

Joining our Reseller Programme is simple. You only need to register using the contact form on our www.regtones.com website and ask for sending the Reseller Agreement, which must be signed and sent to the headquarters of our company.

Domain Backend Services

We offer Backend Services for most of registries and registrars.

The single place for the administration of your domains without high costs of development and operation. You will only utilize a single API or only use one web interface!

KEY BENEFITS:

- Complete and comprehensive set of domain services
- Web registrar interface
- Over 300+ gTLDs and ccTLDs
- Support New TLDs
- Full unrestricted management from the register (poll messages)
- Whois and DNS services
- Compliant with ICANN requirements
- Special processing (sunrise, specialized namespaces)

Just Plug in

Domain Backend Services (DBS) is a fully automated interface to easily manage domain names. The services offer API access with tools ready to work with your account or accreditation. We have implemented various types of registry interfaces (EPP, API, Web and E-mail based registries).

Implementation is simple. We connect DBS to the registries and you or employees can already **easily manage domains under one web interface**.

Additionally, you get automatic access not only to your domains, but also to register more than 990+ TLDs worldwide!

More comfortable is the direct connection of the internal system via the API to the DBS.

Choose the REGISTRIES

VERISIGN • AFILIAS • CENTRALNIC • CORENIC • DEMANDMEDIA • DONUTS • FAMOUS FOUR MEDIA • I-REGISTRY LTD. • MINDS + MACHINES • PEOPLEBROWSR • PIR • RIGHTSIDE REGISTRY • AND MORE...

AC • AT • BE • BG • CO.CZ • CO.NL • CO.NO • CO.UK • CZ • DE • DK • EU • FI • FR • GG • GL • IO • IT • JE • LV • ME • NL • PL • RO • SK • UK • AF • AM • CN • MN • PH • PS • AG • AS • BZ • DM • EC • GY • HN • LC • SX • VC • CD • CF • CM • GA • GM • LA • MG • ML • MU • SC • SH • SO • ST • UG • ZA • CC • CX • FM • GS • KI • NF • PM • PW • RE • SB • TF • TK • TV • WF • CL • CO.RS • CO.TZ • COM.HK • COM.HR • EE • HK • HR • RS • SE • SI • AND MORE...

www.regtons.com

Domain Backend Services

*Are you an accredited registrar? Is your own back-end system expensive?
You don't need to build the domain systems!*

Automation

We have a powerful API that gives you broad flexibility and control over your domains. Ideal to integrate with your own systems.

API

SOAP (<http://regtons.com/manual/>)
EPP (<http://epp.regtons.com/docs/>)

Sandbox

Demo server: demoreg.net

EPP Protocol

Server uses standard EPP protocol specified in RFC 5730, 5731, 5733 and 5734.

Server (Production): epp.regtons.com

Server (OT&E): epp-ote.regtons.com

Port 700

Protocol: standard TCP transport as specified in RFC 5734 secured by SSL

Overall address: [ssl://epp.regtons.com:700](https://epp.regtons.com:700)

Overall address (OT&T): [ssl://epp-ote.regtons.com:700](https://epp-ote.regtons.com:700)

AnyCAST DNS

Your DNS is always accessible, in the best time, across the entire world!

Why Anycast

- 100% Uptime
- DDOS protection
- one IP address in every location
- service reliability
- high availability
- locality / latency improvements
- Load Balancing
- distributed response to DoS
- Nodes in all continents

Anycast

Anycast is networking technique where the same IP prefix is advertised from multiple locations. The network then decides which location to route a user request to, based on routing protocol costs and possibly the „health“ of the advertising servers.

With anycast, the same IP address can be assigned to n servers, potentially distributed across the world.

What are the main advantages of using Anycast?

One of the major advantages is to reduce latency in response. A user accessing the service from a particular location will be directed to the nearest endpoint providing the service.

Higher service uptime. An issue or technical glitch in one of the anycasted resource will not affect the other one in another location, due to which users can be routed to that location.

Better resistance against Distributed Denial Of Service Attacks.

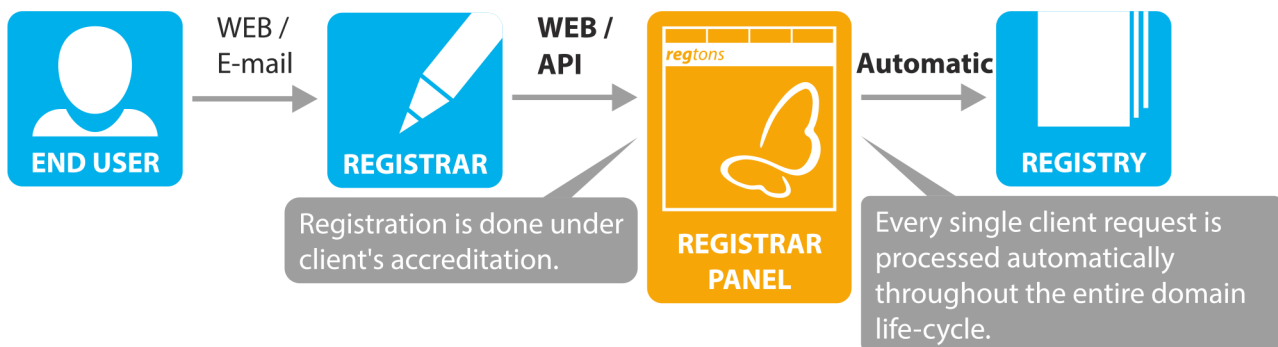

Registrar Panel

The Regtons Registrar Panel is a fully automated interface to easily manage domain names. The service offers both API access and White-label solution with tools ready to work with your accreditation. We have implemented various types of registry interfaces, including EPP and other standard protocols. There are also many Web and E-Mail based registries without official API service included.

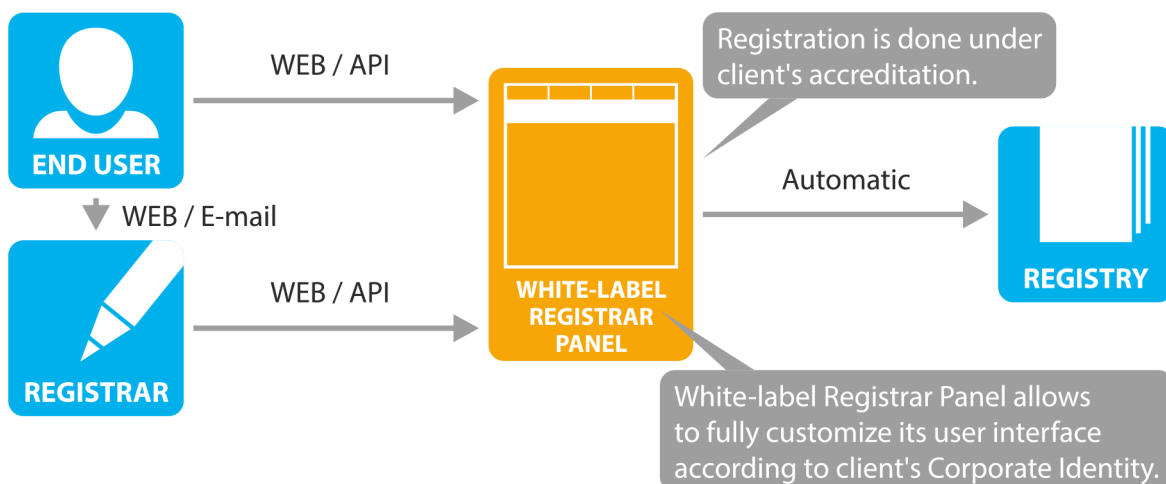

STANDARD MODEL

REGISTRAR PANEL SOLUTION

WHITE-LABEL SOLUTION

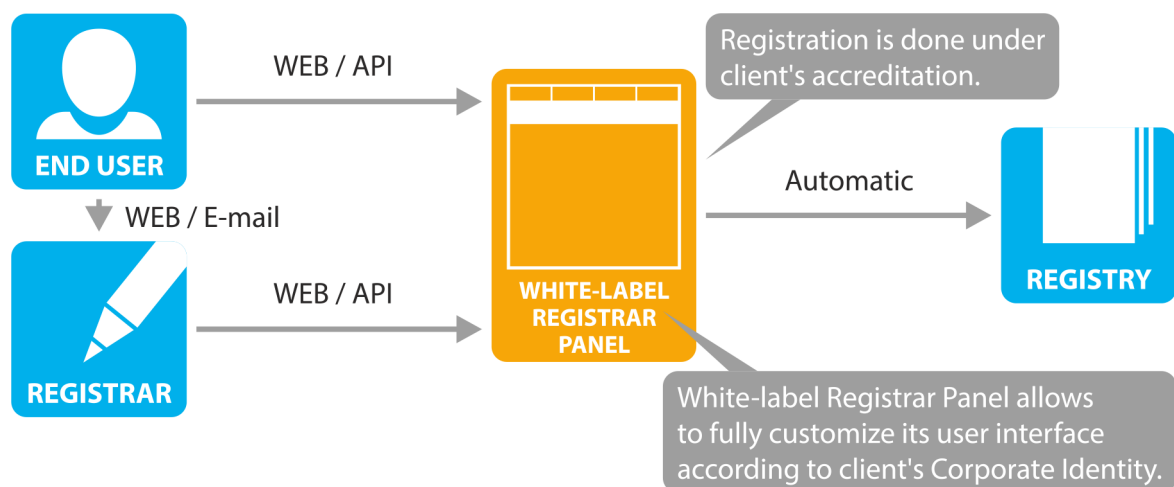

White-label solution

The administration system of Regtons.com has been developed not only with respect to the needs of reseller and registrars but as well for easy use of end users. This fact enables to **use the whole system as white-label solution**. If you wish to offer to your clients a complete range of services of Regtons.com and automatic registration in an easy way, you may register in our white-label program. You provide us only with graphics of your website. The **administration system** and **all functions** connected with it **will be supplied by us**. Currently there are several registrars all over the world who function fully automatically thanks to our white-label solution.

WHITE-LABEL REGISTRAR SOLUTION
